## our work ...

Peach Consultancy's work has two closely-linked strands:

We provide strategic management support, business planning, organisational development, funding, programme development, partnership building, contracting and research & evaluation services directly for Voluntary and Community Organisations.

We work in partnership with statutory and representative bodies including Local and Health Authorities, Primary Care Trusts, CV's and umbrella groups to establish, support, develop, monitor and evaluate voluntary and community programmes and partnerships. We focus on issues such as service planning and commissioning, capacity and organisational development, community and VCS engagement, effective governance and performance monitoring in areas such as children's services, health, regeneration, social care, enterprise, community safety and cohesion.

## our skills & experience ...

Peach Consultancy employs highly trained and experienced consultants with senior management experience in the voluntary, public and commercial sectors. They include MBA's, members of the Institution of Fundraising, the Institute of Management Consultants, and approved consultants for Futurebuilders England, Charities Aid Foundation, Community Development Foundation, Adventure Capital Fund and the Evelyn Oldfield Unit.

Peach Consultancy has been an approved NCVO consultancy since 2002, and is a member of ARVAC, the Association for Research in the Voluntary and Community Sector, and LARIA, the Local Authority Research Association.

## our perspective ...

The interface between voluntary and statutory operations in increasingly complicated by legislative changes, national policy and funding developments, stakeholder demands and diverse political, cultural and ethical agendas.

We know from our personal experience of senior management within both sectors, that the speed of change is sometimes difficult to keep pace with, and that there is a tension between statutory commissioning and voluntary sector provision. Responding to centrally-driven targets with evidence-based service provision while retaining VCS engagement, flexibility and independence is complex.

However we believe that this complexity provides opportunities for both sectors and that the answer lies primarily in access to information and the forming of strategic partnerships and networks. We have the expertise, strategic vision and practical experience to assist you effectively with this work.

“

**We like the work you've done!  
And we like how you've done it.  
We made the best choice of consultant.**

”

*Children's Strategic Planning Manager  
Royal Borough of Kensington & Chelsea*
